

Tobacco Prevention

Tim White

On Saturday, February 28, ORC students hosted a tobacco prevention/education booth at the St. Mary's Hospital Safety Fair at the Veterans Memorial Fieldhouse.

Students passed out literature and showed displays designed to inform and educate others as to the dangers associated with tobacco use.

This was the second year our students participated in this event.

Also in February, our students traveled to Logan, WV to host a tobacco prevention training workshop for the RESA II RAZE crews. Over 50 students and adults attended this one-day training from five schools in Southern West Virginia.

In March, they taught a tobacco prevention workshop at the Region II Middle School Teen Institute to over 100 youth and adult participants.
