

## ROSS Program

Mark Killen, Coordinator

The ROSS Program is glad to announce that another fine class of students is finishing up their ROSS training and are now looking forward to finding jobs. As a matter of fact, several students of this, the third group, have already found jobs.

This class is made up of Brian Luke, Strat Vuchsas, Harmon (Chuck) Montgomery, Rena Montgomery, and Itisha Moore, 5 outstanding students who have worked hard and are now ready for the work force.

Currently, Chuck Montgomery is working for Hercules in Barboursville and his wife Rena is working for Area Connect Home Helpers. The other students are putting together their resumes and starting to look for work and their options are greatly increased since they have become a part of the ROSS Program.

In the ROSS program, you too will have the opportunity to learn many valuable skills such as how to build a wall, making furniture, how to frame a house, plumbing, repairing drywall and other useful skills; you will be amazed at how much you learn in a few weeks. But the most important skill we teach is how to find that job you've always wanted whether it is in the Building and Maintenance field or in the medical or technology field, we will show you how to prepare yourself for the job and career you've always wanted.

So, if you have always wanted something better for your life, but didn't know where to start, then start with the ROSS Program. We'll show you how to overcome every obstacle that has kept you from getting what you want from your life. If you've ever said to your self, "If someone would just give me a chance..." then the ROSS program is for you. We will give you that chance, we'll give you the help you need to become successful and get what you really want out of your life. You don't have to settle for anything but the best for yourself, let us show you how to get it, and how to get the best out of yourself. That's what the ROSS program is, a program to help you become your very best. Dare to Succeed!
